

## Measurement and Sizing Information

The Line Up takes pride in offering a wide range of sizes in addition to custom fit services for the person with special fit needs. If you have questions about sizing or you need help with special fit needs, please call us. Cost for this service varies depending on the pattern and time needed to customize a pattern.

Follow these important tips for measuring:

- Measure over a form fitting garment such as a leotard or tight, form fitting garment.
- Be consistent. Have the same person measure the entire group.
- The tape measure should be snug. Do not pull tightly or add inches to your measurements.
- Measurements must be accurate to determine correct size.

1. Bust - Stand with arms down and measure fullest part of back and bust.
2. Waist- Measure around the narrowest part of natural waistline.
3. Hips - With feet together measure the fullest part of your hips.
4. Torso Girth - Place tape measure at center of shoulder through legs, up the back, meeting the tape measure at the shoulder. This is one of the most important measurements for determining leotard, unitard and biketard size.
5. Inseam - Measure from inside the upper leg at the crotch to the floor.

## How to Determine Size

The sizing chart below provides you with average measurements for each size. Most of our styles are available in both child and adult sizes. When you are between sizes, we recommend selecting the larger size. Alterations to a garment that is too small is much more difficult to accomplish than to one that is too large. Prices for garments in our catalog and online do not include special cuts or alterations. Please call us at 1-888-454-6387 for more information regarding sizing or costs for special cut garments.
